

	SLR Supplier Legal Registration	SCA Supplier Capability Assessment	FAD Factory Audit	FQA ISO9001 Assessment	SAC Social Accountability
Concept					
When it takes place?	<p><i>I'm contacting new suppliers, sourcing for new products/suppliers or I currently buy from a Supplier.</i></p> <p><i>When I want an independent and detailed study of my Supplier, from general information to production details, security, social accountability, materials handling, etc...</i></p> <p><i>When my industry and/or customers require my suppliers to comply with certain standards.</i></p>				
Why do I need it?	To minimize risk of non-existing suppliers. Confirm reliability, formality, legal commercial registration and professionalism of my current suppliers or new suppliers.	To minimize the risks of choosing wrong suppliers by confirming their basic manufacturing and quality assurance capabilities. It is also a perfect and a very economic study to test supplier's honesty through a self assessment and its confirmation.	I need a comprehensive check (pictures & video) of your product manufacturer/suppliers, including facilities, staff qualification, machinery, production process & capacity, quality control system, medical & fire emergency facilities, etc.	Confirm reliability of the Quality System of my current suppliers or new suppliers according to ISO 9001 standard series. Are they capable to sustain Quality over time?	Many factories in China may have children working, over loaded workers, no pollution control systems, unsafe working conditions, etc... You may want to select only social and environmental responsible suppliers.
What do I get?	Complete report with supplier's business license confirmation and export license information if available. At the same time a verification for address, license type, etc...	Stage 1. Supplier Self-Assessment. Suppliers auto-evaluate their own capabilities. Stage 2. SBE Assessment. SBE will assess the Supplier capabilities at their facilities.	Scoring Card Qualification Report (Pictures, videos and charts) - On time Objective and Information - Technical Analysis	Scoring Card Qualification Report - on time Objective and Information - Technical Analysis	Scoring Card Qualification Report - on time Objective and Information - Technical Analysis
Report Sections	<ul style="list-style-type: none"> ✓ Findings Summary Per Location ✓ Business License Translation ✓ Confirmation with Ministry of Commerce ✓ Export License Confirmation ✓ Location Confirmation and Identification ✓ Evidence Copy 	This report is divided in two parts, one with Supplier's self assessment and another with a SBE Auditor confirmation. SBE Recommendations...					
New Suppliers	It's a must... The minimum check to be done before transferring money...	It's a must... At least a self assessment to help me to evaluate and select a proper supplier...	Highly recommended... Evaluate your suppliers professionally, prevent instead of lament.	Optional... Only when, by system, supplier shall comply with the standard.	Optional... When your industry requires it and you are concerned about SA.
Old Suppliers	Optional... Only if you doubt...	Recommended... Economic study as a regular check-up.	Recommended... To count with an updated full picture of my suppliers.	Optional... Only when, by system, supplier shall comply with the standard.	Optional... When your industry requires it and you are concerned about SA.
